

# 3D RETRACTOR Safety Wedge

The small but effective equipment

- ✓ durable: chamfered edges prevent from splintering
- ✓ ideal positioning: thanks to two overlapping working heights
- ✓ sophisticated: suitable for use with all TEE-UU holsters

2'pcs. 3D RETRACTOR wedges

## Description

Elaborately manufactured wooden wedge made of beech with chamfered edges.

Its two wedge-shaped surfaces, designed for use in two orientations with interlocking effective height allow for ideal positioning:

- 4 to 25 mm | - 20 to 35 mm

Chamfers prevent from splintering and provide for a long operation.

Due to length of 125 mm, wedges are tailored for storage in any TEE-UU holster and of course TEE-UU rope bags, used by fire fighters. 3D RETRACTOR offers wide range of applications, such as route of withdrawal at firefighting or keeping open the entryway for following forces.

The 3D Retractor is made from EUDR-compliant wood.

### Features:

- chamfered edges
- two wedge-shaped surfaces with interlocking effective height
- suitable for storage in TEE-UU holsters and rope bags

## Scope of delivery

Set of 2 wooden wedges without further or pictured supplies
