AMPUSAFE CONNECT
Ampoule Kit

Description

The perfect solution for anyone who needs to wear small number of controlled substances or ampoules securely stowed on the body.

Its two-way belt loop made of high-performance fabric allows for mounting the ampoule kit vertically or horizontally on the belt. This guarantees permanent, personal control over content inside and having necessary medication quickly at hand when needed.

It is designed for holding of up to five ampoules. Thanks to robust EVA hard foam shell, is tailored to the challenges at service of EMS.

Convenient detail:

Information, such as a table for medication dosages or a list of contents, can be placed behind transparent film on the inside. This ensures that information is clearly legible when case is opened.

Features:

- shock-protected with 8 elastic loops in two sizes, plastic sleeve:
 - 5 small elastic loops for phials up to 2 ml
 - 3 large elastic loops for phials up to 10 ml

- transparent sleeve
- zipper with large zipper puller
- high-performance 2-way-belt loop at rear

Scope of delivery

Ampoule kit without further or pictured supplies
