AMPUSAFE SMALL, red:
empty, opened

AMPUSAFE SMALL, black
use case: filled with ampoules

AMPUSAFE SMALL Ampoule Kit, black

Description

The ampoule is designed to meet the needs of paramedics etc. in the EMS. This compact storage solution holds up to five phials and is made of durable EVA foam, which protects against impacts and external damage. The reliable ampoule kit ensures that you have most important phials always close at hand and securely stored.

Thanks to its space saving design, it is ideal suited for stowing inside of any trouser pocket or in paramedic holsters.

Practical details facilitate working with the AMPUSAFE SMALL: Transparent sleeve inside of top cover allows for easy recognizable stowing of important information such as dosage instructions etc.

Thanks to zipper in contrasting color and large zipper puller ampoule kit can easily be opened.

Hook-and-loop fastener on the back allows for quickly and securely attaching the ampoule kit to emergency backpacks, bags, etc.

Features:

- shock-protected with 13 elastic loops in two sizes, plastic sleeve

- zipper with large zipper pull tab
- hook-and-loop strap at backside kit without further or pictured supplies

Scope of delivery

Ampoule kit without further or pictured supplies
