

# APPLICATION OF INJURY - for use with CRASH & CARRY

For realistic simulation of injuries at CRASH & CARRY Training Dummy

- ✓ quick and easy operation: variety of 36 ready-to-use injury simulations
- ✓ wide range of emergency simulations
- ✓ re-usable

overview variety of injury patterns

## Description

Set consists of 36 laminated pieces with a variety of realistically illustrated injuries, as well as one piece for individual labeling, e.g. "responsive", "unconscious", etc.

The pieces are re-usable, water-proof and high durable laminated. Injury patterns also have a hook-and-loop fastener for attachment to the CRASH & CARRY training dummy. Perfect for realistic training.

### Features:

- laminated
- hook-and-loop strap at rear
- labelling at rear
- contour-cut

## Scope of delivery

36 injury patterns packed into plastic pocket, without further or pictured supplies

## Specifications

- |                     |                           |
|---------------------|---------------------------|
| • quantity:         | 36 injury patterns        |
| • dimension (max.): | DIN A4                    |
| • weight:           | approx. 1.0 kg (in total) |
| • print:            | 4-color printing          |
| • thickness:        | 0.125 mm, each            |
