CARGO TACTICAL

Description

With the CARGO Pocket Holster we put a new spin on the idea of holsters! Overview and immediate access to equipment in your thigh pocket thanks to the “invisible” companion.

Pens, penlight, protective gloves and furthermore items can be put into the elastic loops of the holster and are therefore immediately available. For storage of rescue scissors, holster is equipped with puncture-protected slip in pocket.

The individually adjustable design of the holster allows for adapting it to height and width of your thigh pocket. Depending on your needs it can be arranged from (w x h) 12.5 x 14 cm up to a maximum of (w x h) 17 x 19 cm.

Once it is adjusted to size of your pocket, it slips into the pocket and is almost “invisible”, but provides easy access to items inside. Thanks to small elastic loop on top of holster, it can easily be removed out of the pocket.

Features:

- 2 wide and 2 small elastic loops at outside

- 8 elastic loops (different size) inside of holster, thereof:
 - 1 with puncture-protected pocket e.g. for rescue scissors
 - elastic loop for removing holster out of thigh-pocket
 - 2 reinforced hook-and-loop straps for adjusting of holster
 - 2 hook-and-loop straps for reduction of depth inside

Scope of delivery

Holster without further or pictured supplies
