ESCAPE mounted at SCBA

ESCAPE: holster and inner bag,
use case with smoke escape hood

ESCAPE Escape-Hood-Holster

Descriptions

Bag for firefighters with SCBA to have escape hood always with them mounted to SCBA and ready for use within only a few seconds.

Simple and intuitive operation of the ESCAPE turn this product in a highly valuable companion during operation, in case of an SCBA emergency situation or for rescue of a victim trapped in smoke. With just one pull at the easy to grasp handle the smoke escape hood is immediately at hands und ready for use. Even in situations with zero view and at major stress.

Due to design of inner bag ESCAPE is suitable for wide range of common smoke hoods and also escape hoods with air connection. In many fire trucks slim design of holster provides opportunity to store the ESCAPE already attached to the SCBA while SCBA is stowed in its holder. This saves important time during rigging for operation and prevents important equipment for being forgotten at fire truck.

Well-thought-out combination of holster and inner bag, which can be pulled out, reduce eventuality of possible contamination of equipment that is stored inside.

Features:

- Holster with cover flap and pull-out handle
- extractable and individually adjustable inner pocket
- 2 holding straps with adjustable length
- exterior textile loop
- reflective stripe, height: 50 mm

Scope of delivery

Holster with inner bag and two holding straps, without further or pictured supplies
