

FUNCTION Reflective Strips Set

Variable role identification for the CHANNEL radio holster in a set of 5

- ✓ bright: highly effective reflective strips for shoulder strap of CHANNEL holster
- ✓ perfect complement: role identifiers in white, red, blue, green, and orange
- ✓ situational: quick change of color depending on the role of personnel

FUNCTION, blue:
rear with
hook-tape

Use case: CHANNEL with FUNCTION, green

FUNCTION reflective strips, set of 5

Descriptions

The five different-colored reflective strips of the FUNCTION set are the perfect addition to the CHANNEL radio holster.

Whether it is for role identification during use or for personalized assignment of holsters and radios, the FUNCTION reflective strips enable both and more.

In addition to the yellow strip of CHANNEL holster, the reflective strips feature the colours used for role identification at EMS:

- white
- red
- blue
- green
- orange

Quick change, clear identification, good visibility. These are the advantages of the reflective strips. Thanks to the hook-and-loop straps at either end, they are permanently attached to the shoulder strap of the CHANNEL but can be easily detached and changed in just a few simple steps.

Features:

- set of five reflective strips in white, red, blue, green, and orange

- high-visibility reflective surfaces
- perfectly fits the shoulder strap of the CHANNEL radio holster (2707-90xx)
- hook-and-loop straps at either end for fixing to the shoulder strap of CHANNEL holster

Scope of delivery

Five reflective strips in different colors with hook-and-loop fastener tape at each end, without further or pictured supplies
