

# GEARBAG PRO Rapid Intervention Bag

The only one with wheels and fixation system!

- ✓ functional: immediate access to respirator mask and air supply
- ✓ spacious: main compartment with capacity of 55 l and fastening straps for BA
- ✓ sophisticated: integrated mounting for fire axe or Halligan tool

## Description

For rapid intervention team the RIT-Bag is essential part of gear, to carry important equipment for use at search and rescue operation.

Due to spacious capacity GEARBAG PRO offers a wide range of possible applications – according to individual, local contingency plan. Main compartment (cap.: 55 liters) is suited for storing of a complete SCBA along with additional items.

Mounting opportunity for an axe or a halligan-tool at the outside. Everything what is fixed to the bag has not to be carried!

Ultra-fast accessible respirator mask compartment provides space for essential equipment that is mandatory for establishing of breathing-air supply: respirator mask, regulator, valve of SCBA.

Thanks to integrated fixing straps bag can be placed on upper body of victim, in order to ensure breathing-air supply at entire rescue operation.

Robust trolley system, durable aluminum die-cast rolls and slide bars at bottom allow for effort-saving evacuation.

## Features:

- main compartment (55 liters, 3 retaining straps for BA)
- respirator mask compartment (15 liters, 2 inner pockets)
- outside zipper compartment with fixing system (straps)
- detachable, yellow hook-and-loop patch
- mounting opportunity for axe or halligan-tool
- roller bag with durable die-cast aluminum rolls
- two heavy-duty handles and heavy-duty gear loop

## Scope of delivery
