- ✓ always operational: main compartment designed for one hand operation
- ✓ efficient: capacity for two radios and extensive first aid equipment
- ✓ neat: elastic loops and straps for optimal overview

Use case

IFAK RADIO front view, opened

IFAK RADIO front view

Description

IFAK Radio is the happy combination out of a harness for carrying of radios and a pouch for an individual first aid kit.

Main compartment is designed for one-hand operation and can be easily opened by pulling at superior loop. This allows for immediate access to complete equipment inside of the chest rig.

Elastic loops are suited for stowing of expandable items. Additional equipment can be stowed in middle of the compartment as also in individually adjustable elastic loops at interior of cover. Exterior zip-pocket at rear allows for stowing of items such as smartphone etc.

Each of both lateral radio compartments is suitable for holding one digital radio. Elastic loops with buckle protect against loss of radios.

Hook-and-loop area at superior enables for individual labelling.

TEE-UU logo is attached with hook-and-loop fastener.

Features:

- 2 exterior radio compartments for digital radios
- superior loop-tape for labelling and zip compartment at rear

- main compartment designed for single-hand operation with:
 - 3 individually adjustable elastic loops on interior of cover
 - 2 elastic loops at each side and 3 elastic loops at rear side
- TEE-UU logo removeable, thanks to mounting with hook-and-loop fastener
- breathable padding at rear
- individually adjustable shoulder straps with wide range

Scope of delivery

Chest Rig without further or shown supplies
