KEYBOARD Key Rack: use case in lever arche file.

KEYBOARD Key Rack: use case

KEYBOARD Key Rack

Description

The KEYBOARD Key Rack is perfect solution for storing of twelve keys with detachable key clips in a neatly arranged and space-saving way. Thanks to the punched holes the key rack is designed for filing it into BIG Organizer or many other filing systems with ring binder such as DIN A4 lever arche files.

Enclosed key fobs ensure for clearly visible labeling. Download-link for download of labeling template for key fobs is included in delivery.

Stored in this way, important keys are always immediately at hand and quickly packed away again. Thanks to elastic loops below of the key clips, keys can be stored flat on surface of keyboard. This saves space and allows for storing or more than just one KEYBOARD in your filing system.

Features:

- 12 detachable key-holders with key fobs
- download-link leading to labeling-template for key fobs
- elastic loops for fixation of keys flat on KEYBOARD
- 2-hole punch with durable metal eyelets

Scope of delivery

Key Rack with 12 key clips, key fobs and download-link leading to labeling template; without further or pictured supplies
