

KOMBI XL Rope Bag

Safety line & useful equipment: the one bag for all

- ✓ comfortable fit: wearable as fanny pack or across the shoulder
- ✓ instant access: bottom compartment for useful equipment
- ✓ reassuring: no accidentally unwinding of rope

KOMBI XL Rope Bag

Description

In order to work as safely and effectively as possible, rescue teams working in hazardous atmospheres – as recommended by the regulations – need more live-saving appliances than just one rope. The KOMBI Rope Bag XL is the solutions for all these problems. It can be worn as fanny pack or alternatively over the shoulder next to your respiratory protection device.

Loop fasteners on the exterior allow for the attachment of other TEE-UU holsters, such as MASK Holster for a fire emergency mask, MICRO Holster for additional rescue scissors, and more.

Well thought design of KOMBI Rope Bag XL guarantees immediate access to most important equipment when being used as waist bag.

Due to infinitely adjustable Dual carrying-strap, that can be opened both sides (38mm wide, usable length: 150cm), perfect fit of bag is guaranteed.

Features:

- reflective stripe (height: 50mm) for additional safety

- rope compartment protected against unwinding of rope and with clasp for fixation of end of rope
- loop fastener for attachment of TEE-UU holsters
- marking area for permanent labelling
- infinitely adjustable Dual carrying-strap
- Reflective imprint FEUERWEHR

Scope of delivery

KOMBI Rope Bag, carrying strap; without further or pictured supplies
