- ✓ variable: vertical and horizontal attachment to belt

use case:
tough cut scissors

use case:
knife and tough cut scissors

rear:
abrasion proof 2-way belt loop

PLUS ULTRA Holster with two compartments

Description

Sophisticated holster, designed for easy access to basic equipment such as trauma scissors and multitool or rescue knife.

Due to well thought out arrangement of each of both main compartments can be opened with a flick of the wrist – intuitively and reliable.

Two exterior elastic loops provide storage space for additional items, such as a small torch, wooden wedges or also protective gloves.

Belt loop, made of tearproof Hyperlon allows for both, vertical or horizontal attachment of holster to TEE-UU paramedic belts.

Features:

- main compartment with lid, e.g. for trauma scissors (Height: from 16 cm up to max. 21 cm)
- front pocket with lid e.g. for multi tool or rescue knife with flap in contrasting color (Height: up to max. 14 cm)
- 2 exterior elastic loops e.g. for wooden wedges, torch etc.

Scope of delivery

Holster, without any further or pictured supplies
