

# RAPID Trauma-Simulation

Quick, easy to use and realistic injury simulations for rich in variety training units

- ✓ diversely: 14 trauma simulations of different appearance
- ✓ reusable: washable material for repeated use
- ✓ universally: material adapts to individual anatomy of actor

RAPID: use case at leg

Overview RAPID Trauma-Simulations

## Description

Consisting of 14 simulations, the set opens up new possibilities in the arrangement of training units. Within seconds injuries of most different kind can be simulated. Actors slip simulations over arm or leg like socks. Elastic material of simulations adjusts automatically to individual anatomy of actor's arm or leg.

Variety of simulations ranges from burns, cauterization, abrasion, laceration and incision up to amputation.

At a passing view, the injury simulations do hardly miss the desired effect!

Material is washable at 30° C and reusable. In order to protect simulations from damage during cleaning, a washing bag is included in delivery.

Whole simulation kit becomes delivered in neat and robust assortment box.

### Features:

- washbag for careful washing of trauma simulations

- 14 different, reusable trauma simulations for use at arm and leg
- assortment-box for neatly arranged storage

## Scope of delivery

14 reusable trauma simulations and one wash bag for trauma simulations in a neat assortment box, without further or pictured supplies

## Specifications

- dimensions (w x h x d): 47 x Ø 6 - 18 cm, each
- weight: approx. 15 g, each
- color: various
- material: 88% nylon, 12% spandex
- article-no.: 1125-0000
