

THERMO PADs for training dummy

For search of CRASH & CARRY or JUNIOR dummy with thermal imaging camera

- ✓ exciting: more variety at training
- ✓ facilitating: simple, quick preparation for exercise
- ✓ economical: available in a set of 10 pieces

Use case: THERMO PAD at CRASH & CARRY Training Dummy

THERMO PAD (TEE-UU logo: drawing)

Description

Designed for training of search and rescue operations with utilization of a thermal imaging camera. THERMO PADs are self-adhesive and therefore can be fixed quick and easy on your CRASH & CARRY or JUNIOR training dummy.

Activation and operating time:

After unpacking THERMO PAD is automatically activated and operational after approx. 20 min. of activation time. Pad develops a heat signature, that is clearly visible via infrared. THERMO PAD heats up to a temperature of about 50° C. At an air temperature of about 20° C, pad operates for at least four hours.

Operation and disposal:

The self-adhesive pad is designed for single use only and can be disposed of as domestic waste after it has been used.

Scope of delivery

Set consisting of 10 pieces of THERMO-PADs, without any further or pictured supplies
